Foreword

About Myself

For many years I struggled to learn Spanish, and I still knew no more than about twenty words. Consequently, I was extremely frustrated. One day I stumbled upon this method as I was playing around with word combinations. Suddenly, I came to the realization that every language has a certain core group of words that are most commonly used and, simply by learning them, one could gain the ability to engage in quick and easy conversational Spanish.

I discovered which words those were, and I narrowed them down to three hundred and fifty that, once memorized, one could connect and create one's own sentences. The variations were and are *infinite*! By using this incredibly simple technique, I could converse at a proficient level and speak Spanish. Within a week, I astonished my Spanish-speaking friends with my newfound ability. The next semester I registered at my university for a Spanish language course, and I applied the same principles I had learned in that class (grammar, additional vocabulary, future and past tense, etc.) to those three hundred and fifty words I already had memorized, and immediately I felt as if I had grown wings and learned how to fly.

At the end of the semester, we took a class trip to San José, Costa Rica. I was like a fish in water, while the rest of my classmates were floundering and still struggling to converse. Throughout the following months, I again applied the same principle to other languages—French, Portuguese, Italian, and Arabic, all of which I now speak proficiently, thanks to this very simple technique.

This method is by far the fastest way to master quick and easy conversational language skills. There is no other technique that compares to my concept. It is effective, it worked for me, and it will work for you. Be consistent with my program, and you too will succeed the way I and many, many others have.

INTRODUCTION TO THE PROGRAM

People often dream about learning a foreign language, but usually they never do it. Some feel that they just won't be able to do it while others believe that they don't have the time. Whatever your reason is, it's time to set that aside. With my new method, you will have enough time, and you will not fail. You will actually learn how to speak the fundamentals of the language—fluently in as little as a few days. Of course, you won't speak perfect Russian at first, but you will certainly gain significant proficiency. For example, if you travel to Russia, you will almost effortlessly be able engage in basic conversational communication with the locals in the present tense and you will no longer be intimidated by culture shock. It's time to relax. Learning a language is a valuable skill that connects people of multiple cultures around the world—and you now have the tools to join them.

How does my method work? I have taken twenty-seven of the most commonly used languages in the world and distilled from them the three hundred and fifty most frequently used words in any language. This process took three years of observation and research, and during that time, I determined which words I felt were most important for this method of basic conversational communication. In that time, I chose these words in such a way that they were structurally interrelated and that, when combined, form sentences. Thus, once you succeed in memorizing these words, you will be able to combine these words and form your own sentences. The words are spread over twenty pages. In fact, there are just nine basic words that will effectively build bridges, enabling you to

Introduction to the Program

Speak in an understandable manner (please see Building Bridges). The words will also combine easily in sentences, for example, enabling you to ask simple questions, make basic statements, and obtain a rudimentary understanding of others' communications. I have also created Memorization-Made-Easy Techniques for this program in order to help with the memorization of the vocabulary. Please see Reading and Pronunciation in order to gain proficiency in the reading and pronunciation of the Russian language prior to starting this program.

My book is mainly intended for basic present tense vocal communication, meaning anyone can easily use it to "get by" linguistically while visiting a foreign country without learning the entire language. With practice, you will be 100 percent understandable to native speakers, which is your aim. One disclaimer: this is not a grammar book, though it does address minute and essential grammar rules (please keep your eyes peeled for grammar footnotes at the bottom of each and every page of the program). Therefore, understanding complex sentences with obscure words in Russian is beyond the scope of this book.

People who have tried this method have been successful, and by the time you finish this book, you will understand and be understood in basic conversational Russian. This is the best basis to learn not only the Russian language but any language. This is an entirely revolutionary, no-fail concept, and your ability to combine the pieces of the "language puzzle" together will come with great ease, especially if you use this program prior to beginning a Russian class.

This is the best program that was ever designed to teach the reader how to become conversational. Other conversational programs will only teach you phrases. But this is the only program that will teach you how to create your own sentences for the purpose of becoming conversational.
