mapt.io

Mapt is an online digital library that gives you full access to over 5,000 books and videos, as well as industry leading tools to help you plan your personal development and advance your career. For more information, please visit our website.

Why subscribe?

- Spend less time learning and more time coding with practical eBooks and Videos from over 4,000 industry professionals
- Improve your learning with Skill Plans built especially for you
- Get a free eBook or video every month
- Mapt is fully searchable
- Copy and paste, print, and bookmark content

Packt.com

Did you know that Packt offers eBook versions of every book published, with PDF and ePub files available? You can upgrade to the eBook version at www.packt.com and as a print book customer, you are entitled to a discount on the eBook copy. Get in touch with us at customercare@packtpub.com for more details.

At www.packt.com, you can also read a collection of free technical articles, sign up for a range of free newsletters, and receive exclusive discounts and offers on Packt books and eBooks.

Contributors

About the author

Ed Robinson works as a senior site reliability engineer at Cookpad's global headquarters in Bristol, UK. He has been working with Kubernetes for the last three years, deploying clusters on AWS to deliver resilient and reliable services for global audiences. He is a contributor to several open source projects and is a maintainer of Træfik, the modern HTTP reverse proxy designed for containers and microservices.

About the reviewer

Manuel Tiago Pereira is a software engineer with vast experience of automating infrastructure provisioning and configuration for systems from development environments to highly available platforms for web applications. For the last couple of years, he has been invested in providing solid platforms for application deployments using Kubernetes. He has dedicated most of his professional career to SaaS companies and he's currently working at Talkdesk in order to make life easier for call-center operators and increase their customers' happiness.

Packt is searching for authors like you

If you're interested in becoming an author for Packt, please visit authors.packtpub.com and apply today. We have worked with thousands of developers and tech professionals, just like you, to help them share their insight with the global tech community. You can make a general application, apply for a specific hot topic that we are recruiting an author for, or submit your own idea.

Table of Contents

| Pretace | 1 |
|---|----------|
| Chapter 1: Google's Infrastructure for the Rest of Us Why do I need a Kubernetes cluster? | 7 |
| The roots of containers | 10 |
| Enter the container | 10 |
| Cgroups | 11 |
| Namespaces | 11 |
| Putting the pieces together | 12 |
| Here, schedule this | 12 |
| The basics of Kubernetes | 14 |
| The pod Labeling all the things | 14 17 |
| Replica sets | 17 |
| Services | 20 |
| Under the hood | 21 |
| API server | 21 |
| Controller manager | 22 |
| Scheduler | 22 |
| Kubelet | 23 |
| Summary | 23 |
| Chapter 2: Start Your Engines Your own Kubernetes | 25 25 |
| Installation | 25 |
| macOS | 27 |
| Linux | 27 |
| Windows | 28 |
| Starting Minikube | 28 |
| First steps with kubectl | 29 |
| Building Docker containers inside the cluster | 31 |
| Building and launching a simple application on Minikube | 32 |
| What just happened? | 34 |
| Rolling out changes Resilience and scaling | 35 36 |
| Using the dashboard | 38 |
| Configuration as code | 43 |
| Troubleshooting Minikube | 45 |
| Summary | 45 |
| - | |
| Chapter 3: Reach for the Cloud | 47 |
| Cluster architecture | 48 |

| Creating an AWS account | 49 |
|--|-----|
| Creating an IAM user | 49 |
| Getting the CLI | 54 |
| Setting up a key pair | 54 |
| Preparing the network | 57 |
| Setting up a bastion | 61 |
| sshuttle | 63 |
| Instance profiles | 65 |
| Kubernetes software | 66 |
| Docker | 67 |
| Installing Kubeadm | 68 |
| Building an AMI | 69 |
| Bootstrapping the cluster | 69 |
| What just happened? | 72 |
| Access the API from your workstation | 74 |
| Setting up pod networking | 75 |
| Launching worker nodes | 76 |
| Demo time | 79 |
| Summary | 80 |
| Chapter 4: Managing Change in Your Applications | 81 |
| Running pods directly | 83 |
| Jobs | 85 |
| CronJob | 89 |
| Cron syntax | 90 |
| Concurrency policy | 92 |
| History limits | 92 |
| Managing long running processes with deployments | 92 |
| kubectl patch | 95 |
| kubectl edit | 96 |
| kubectl apply | 96 |
| Kubernetes dashboard | 97 |
| Greater control of your deployments | 98 |
| RollingUpdate deployment | 99 |
| Recreate deployment | 100 |
| DaemonSet | 101 |
| Summary | 105 |
| Chapter 5: Managing Complex Applications with Helm | 107 |
| Installing Helm | 107 |
| macOS | 108 |
| Linux and Windows | 108 |
| Installing Tiller | 109 |
| Installing a chart | 110 |
| Configuring a chart | 113 |
| | |

| Creating your own charts | 116 |
|------------------------------------|------------|
| Chart.yaml | 116 |
| values.yaml | 117 |
| templates | 117 |
| Making it your own | 118 |
| Developing and debugging | 120 |
| Templating language | 121 |
| Functions | 123 |
| Flow control | 124 |
| Hooks | 128 |
| Packaging Helm charts | 131 |
| You can test building an index | 132 |
| Using your repository | 133 |
| Organizational patterns for Helm | 134 |
| Chart per application | 134 |
| Shared charts | 135 |
| Library charts | 136 |
| Next steps | 136 |
| Chapter 6: Planning for Production | 137 |
| The design process | 138 |
| Initial planning | 138 |
| Planning for success | 140 |
| Planning for a successful roll out | 141 |
| Discovering requirements | 142 |
| Availability | 144 |
| Capacity | 148 |
| EC2 instance types | 148 |
| EC2 instance types | 149 |
| Breadth versus depth | 150 |
| Performance | 151 |
| Disk performance | 151 |
| gp2 io2 | 152 153 |
| st1 | 153 |
| sc1 | 154 |
| Networking | 155 |
| Security | 156 |
| Always be updating | 157 |
| In-place updates | 158 |
| Immutable images | 159 |
| Network security | 160 |
| Infra-node networking | 160 |
| Node-master networking | 160 |
| External networking | 161 |
| Kubernetes infra-pod networking | 161 |

| IAM roles | 162 |
|---|------------|
| Validation | 164 |
| Observability | 165 |
| Logging | 166 |
| Monitoring | 167 |
| Blackbox monitoring | 169 |
| <u>A</u> lerting | 169 |
| Tracing | 170 |
| Summary | 171 |
| Chapter 7: A Production-Ready Cluster | 173 |
| Building a cluster | 173 |
| Getting started with Terraform | 175 |
| Variables | 177 |
| Networking | 177 |
| Plan and apply | 179 |
| Control Plane | 180 |
| Preparing node images | 183 |
| Installing Packer | 183 |
| Packer configuration | 183 |
| Node group | 185 |
| Provisioning add-ons | 189 |
| Managing change | 190 |
| Summary | 192 |
| Chapter 8: Sorry My App Ate the Cluster | 193 |
| Resource requests and limits | 194 |
| Resource units | 195 |
| How pods with resource limits are managed | 196 |
| Quality of Service (QoS) | 197 |
| Resource quotas | 199 |
| Default limits | 201 |
| Horizontal Pod Autoscaling | 203 |
| Deploying the metrics server | 203 |
| Verifying the metrics server and troubleshooting | 205 |
| Autoscaling pods based on CPU usage | 206 |
| Autoscaling pods based on other metrics Autoscaling the cluster | 210 |
| Deploying the cluster autoscaler | 211 212 |
| Summary | 218 |
| • | |
| Chapter 9: Storing State | 219 |
| Volumes | 220 |
| EBS volumes | 222 |
| Persistent volumes | 225 |
| Persistent volumes example | 226 |
