**Математика** : 5000 заданий для подготовки к всероссийской  
М34 проверочной работе : 1– 4 классы/ Т.С. Позднева, А.А. Кулаков,  
Д.В. Хомяков. — Москва : Издательство ACT, 2019. — 320 с. —  
(Подготовка к всероссийским проверочным работам).

ISBN 978-5-17-113487-7

Пособие предназначено для подготовки учащихся 4-х классов к итоговой аттестации за курс начальной школы по математике. Учащиеся повторят и закрепят основные темы курса математики для начальной школы, что позволит успешно выполнить задания всероссийской проверочной работы. Для удобства подготовки к итоговой аттестации по математике в конце дана демоверсия всероссийской проверочной работы и критерии её оценивания.

Пособие будет полезно на уроках математики и для самостоятельных занятий дома.

## **О ПОСОБИИ**

---

Пособие предназначено для подготовки учащихся 4-х классов к итоговой аттестации за курс начальной школы по математике.

Примеры и задания на все основные темы программы начальной школы помогут ребёнку отработать и закрепить до автоматизма навыки счёта, умение решать задачи всех видов, активизируют мыслительную деятельность, разовьют память, внимание и быстроту реакции, что, безусловно, поможет успешно выполнить всероссийскую проверочную работу.

В пособии пять разделов. В разделе «Сложение и вычитание» представлены задания разных типов: на простое и раздельное сложение и вычитание, на сложение и вычитание с переходом через десяток, сложение и вычитание круглых двузначных и однозначных чисел, сложение и вычитание в пределах 100, 1000 и 10000. Раздел «Умножение и деление» содержит задания, которые позволяют повторить и закрепить навык табличного и нетабличного умножения и деления. Разделы «Устный и письменный счёт», «Решение примеров на порядок действий» помогут отработать навыки счёта до автоматизма. Раздел «Все виды задач для начальной школы» включает простые задачи на сложение и вычитание, умножение и деление, на разностное сравнение, нахождение среднего значения, на пропорции, на проценты, на нахождение цены и стоимости, расстояния, времени и скорости, периметра и площади и др. Для всех задач приведены ответы.

В каждом разделе задания распределены по классам, поэтому пособие можно использовать для подготовки к проверочным работам в любом классе начальной школы.

Для удобства подготовки к итоговой аттестации по математике за курс начальной школы в конце пособия дана демоверсия всероссийской проверочной работы и критерии её оценивания.

Пособие будет полезно на уроках математики и для самостоятельных занятий дома.

## **Раздел 1**

**Т.С. Позднева**

# **СЛОЖЕНИЕ И ВЫЧИТАНИЕ**

## **СОДЕРЖАНИЕ РАЗДЕЛА**

<b>1 КЛАСС.</b> Сложение и вычитание в пределах 10 и в пределах 20 . . .	7
<b>2 КЛАСС.</b> Сложение и вычитание в пределах 100 . . . . .	22
<b>3 КЛАСС.</b> Сложение и вычитание в пределах 1000 . . . . .	37
<b>4 КЛАСС.</b> Сложение и вычитание в пределах 10 000 . . . . .	52

Основные приёмы счёта формируются у ребёнка в первые годы обучения. Именно поэтому очень важно уделить отработке этого навыка особое внимание.

В разделе даны упражнения разных типов: на простое и раздельное сложение и вычитание, комбинированные примеры, на сложение и вычитание с переходом через десяток, сложение и вычитание круглых двузначных и однозначных чисел, сложение и вычитание в пределах 100 в столбик, сложение и вычитание в пределах 1000 и 10 000.

На каждой странице раздела даны две работы с контрольными примерами для самостоятельного решения.
